

THE NORTH CAROLINA STEEL AND IRON CO.

GREENSBORO, NORTH CAROLINA.

BY Client, James A. Odell; Vice-President, Julian S. Carr; General Manager, J. J. Newman; Secretary and Treasurer, S. H. Wiley; Attorney, Theo. F. Klutz. EXECUTIVE COMMITTEE—James A. Odell, A. B. Andrews, Julius A. Gray. DIRECTORS—George W. York; A. B. Andrews, second Vice-President R. & D. R. Co., Raleigh; James A. Odell, President Odell Hardware Co., Greensboro, N. C.; Julius A. Gray, President Cape Fear & Yadkin Valley Railway Company, Greensboro, N. C.; Theo. F. Klutz, Attorney at Law, and President Yadkin Railroad Company, Salisbury, N. C.; Julian S. Carr, President Blackwell's Durham Tobacco Company, Durham, N. C.; J. J. Newman, M. E., President Dutch Creek Mining Co., Salisbury, N. C.

is the famous "Ore Hill" property, in Chatham Co., N. C., that has been property for more than a century. Ores from it were used in the second during the Revolutionary war. During the late civil war the Company selected this locality as the site of large iron and ordinance works. **Optionally High Grade of its Ores.** The lack of railroad facilities has hitherto, the profitable utilization of these ores on any large scale. The location, however, made accessible by the Cape Fear and Yadkin Valley Railroad, should the property.

JO noted iron men in America have examined and reported on these ores, and the company know, there has never been an expert report. **Highly favorable.** Prof. Charles D. Wilber, inspector of mines and early State Geologist of Illinois, and geologist and mining expert for

the Northern Pacific Railroad, visited Ore Hill in 1884. Extracts from his report and the opinions of Dr. E. Emmons, formerly State geologist of North Carolina, Prof. W. C. Kerr, State geologist, Prof. F. A. Genth, of Philadelphia, S. A. Richards, formerly Superintendent for the Joliet Steel Company, Mr. Thomas Graham, a prominent iron manufacturer of Philadelphia, and others, are published in the Company's prospectus.

The "Manufacturers' Record," of Baltimore, having learned of the proposed organization of this company, investigated, on its own account, the Ore Hill Tract. The report of the expert, Mr. Thos. P. Williams, M. E., is also given in the prospectus. The company recently employed Mr. Frederick H. Smith, of Baltimore, a noted mining engineer and mineralogist to examine the property. His report confirmed all that had been claimed, and he advised the company to build the furnaces. Mr. Smith is a man of such eminence in his profession that it would be superfluous to make any mention of the value of his report. He is a member of the American Society of Civil Engineers, a member of the American Institute of Mining Engineers.

Coke for the furnaces will be brought from Pocahontas, 245 miles, by the Norfolk &

Western and Cape Fear & Yadkin Valley Railroads, which will connect at the State line near Mount Airy, N. C.

In the organization of the Company the projectors had in view:

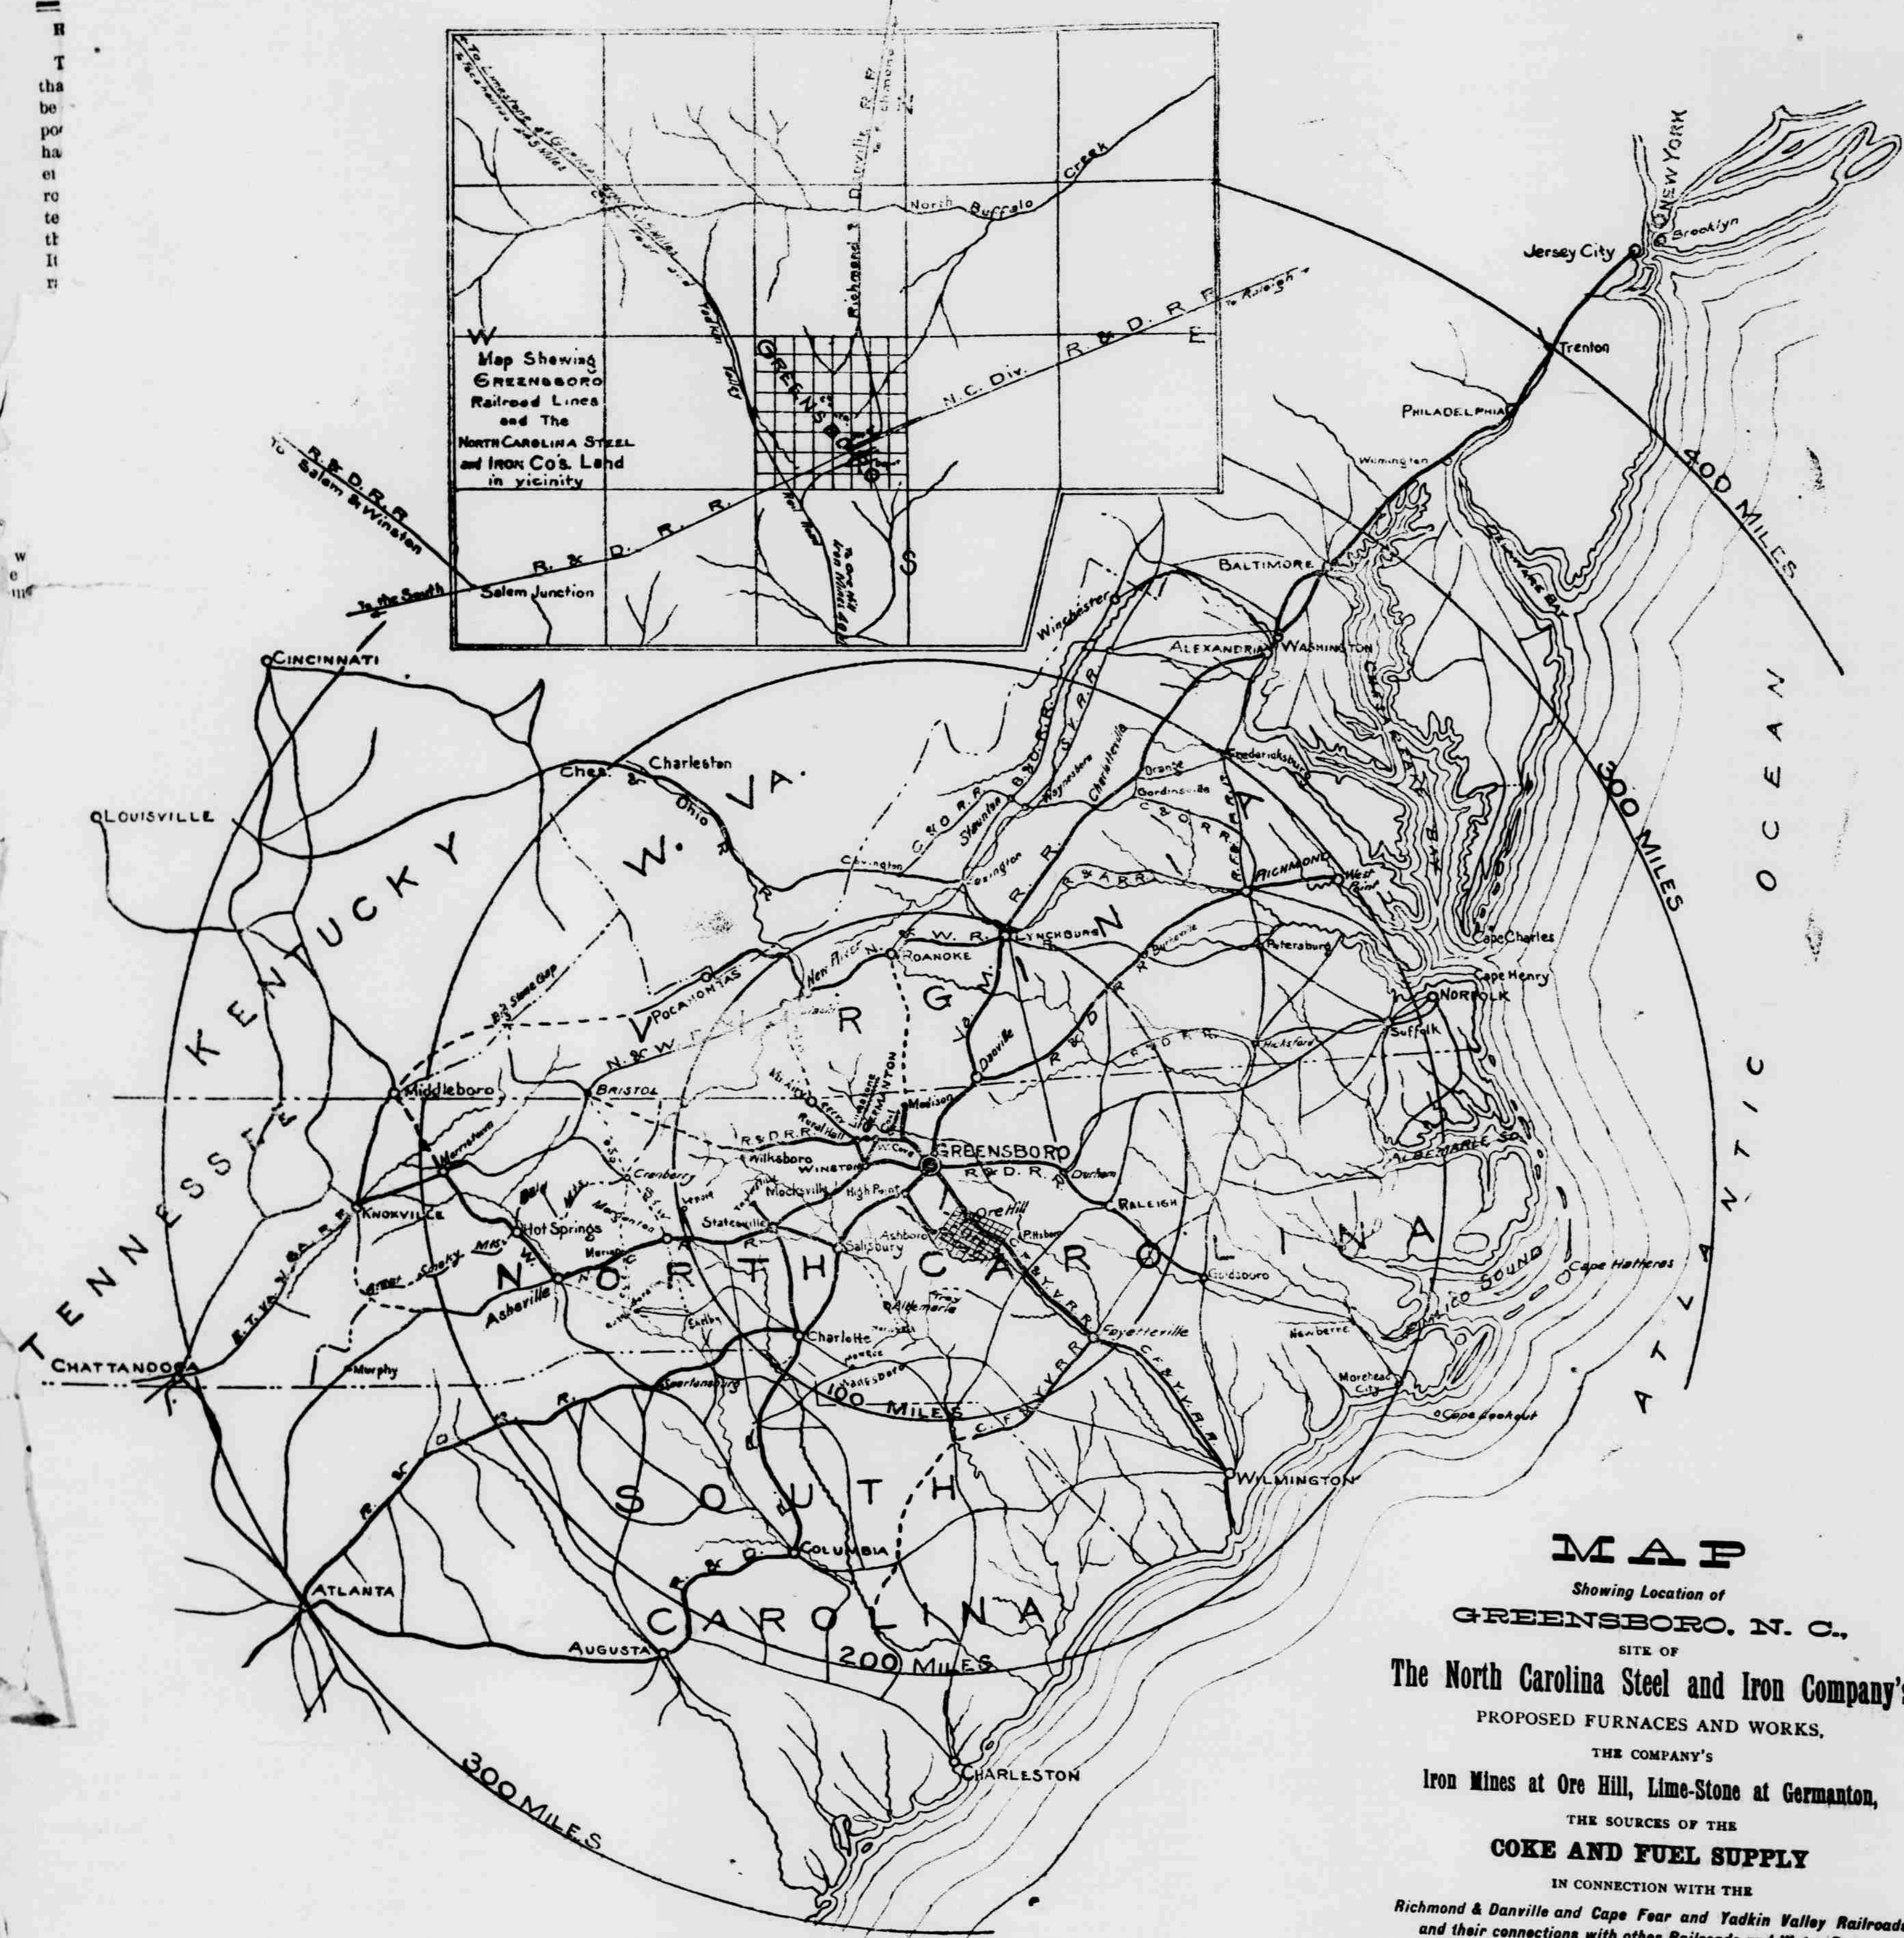

FIRST—The building of furnaces for the manufacture of iron and steel, and ultimately the building of rolling mills and other industries for the utilization of the product of the furnaces.

SECOND—The acquisition of a considerable area of land around the locality that might be selected as the site of the furnaces, in order that the company might itself enjoy the results of its own work, by getting the benefit of the increase in real estate values that would follow the establishment of furnaces and other industries.

THIRD—The inauguration of a general development and town building enterprise, starting with an attempt to secure the location on its property of iron, wood, textile and other industries, thus bringing together an aggregation of factories and stores, and a continually increasing population, with the resulting need for land for business and residence purposes.

tion of the N. C. Steel and Iron Works, has a population now of 7,000, is the capital of Guilford County. It is the junction of three railroads. It is most favorable situated and the climate genial and healthful. It has already 37 industrial institutions and 100 wholesale and retail stores. During the past five years Greensboro has doubled in population. No effort has ever been made to stimulate its growth beyond the usual exertions of legitimate business. It is beyond all question the most central, healthy and desirable, for all kinds of trades and manufacturing as any spot in the United States.

TOWN SITE PROPERTY.

ing its purpose the Company, through its agents, secured options on about 2,500 acres of very desirable property adjacent to Greensboro, some of it being within the corporate limits, and the whole of it being in an almost solid body. About 1,500 acres have been purchased, and the remainder is being taken up as the options expire. The whole of it has been secured at an average price of \$35.00 an acre. This is no more than has been paid for the town site lands on which most of the industrial towns of the South have been built up, and in comparison with which this has the immeasurable advantages of extensive railroad connections and facilities unexcelled by any of them, an attractive, progressive town of 7,000 people to start with. Water-works, gas works, electric light works, paved streets, churches and schools, elegant houses, an established society, and all the attractions that pertain to an old community.

Y of the To It is a great a lina, and one sight of. the al to the capital stock of the Company. This, when added to the expected profit from this Company's furnaces and other works, makes the opening for the investment of capital one of the most inviting that has been presented to the public since the beginning of the present industrial era in the South.

TH JULIUS A. GRAY, M. E., are great rail-road. Their influence is the Company. This is purely a North Carolina industry and there is no reason why the State cannot become one of the great iron producers of the country. People of North Carolina! Look at what your sister States are doing. Subscribes liberally to the stock and trust the men who are at the head of the Company. Their names alone is a sufficient guarantee as to the reliability and successful management; this, also, backed by the fostering interests of the C. F. & Y. V., and R. & D. Railroads.

THEY WILL BUILD AT ONCE TWO 75-TON FURNACES, ONE TO MAKE BESSEMER IRON AND THE OTHER MILL AND FOUNDRY IRON.

IE CAPITAL STOCK OF THE COMPANY IS \$1,000,000.

None of the stock will be sold at less than par. The proceeds will go into the Treasury to be used for development purposes with a view to making valuable the company's lands. It is probable that when one-half the deserving of the (250,000) has been subscribed for, the books will be closed until after the first land sale. For particulars as to time of payment, &c., address the Company at Greensboro, N. C.
